

General information on cookies

We use cookies to make our website as user-friendly and as functional as possible for you. Some of these cookies are stored on the device you use to access the site.

Cookies are small packages of data that are exchanged between your browser and our web server whenever you visit our website. They do not cause any damage and are used solely to recognize website visitors. The next time you access our website using the same device, the information stored in the cookies can then either be sent back to us ("first-party cookie") or to a web application of a third party to whom the cookie belongs ("third-party cookie"). The information that is stored and sent back allows each web application to recognize that you have already accessed and visited the website using the browser on your device.

Cookies contain the following information:

- Cookie name
- Name of the server from which the cookie originates
- Cookie ID number
- An expiry date, after which the cookie will be automatically deleted

We classify cookies in the following categories depending on their purpose and function:

- Technically necessary cookies which are required for ensuring technical operations and the basic functionality of our website (e.g. to be able to access secured areas of the website). These are so-called session or connection cookies.
- Statistics cookies, which collect anonymous data that we analyze to gain an understanding of how visitors interact with our website. These are also used for measuring the reach and access of our website, and to analyze how often specific pages are accessed.
- Marketing cookies, for analyzing user behavior, which is used as a basis for providing personalized, targeted advertising based on your interests.
- Unclassified cookies are cookies that we are trying to classify together with individual cookie providers.

Depending on the storage period, we also divide cookies into session and persistent cookies. Session cookies store information that is used during your current browser session. These cookies are automatically deleted when the browser is closed. No information remains on your device. Persistent cookies store information between two visits to the website. Based on this information, you will be recognized as a returning visitor on your next visit and the website will react accordingly. The lifespan of a persistent cookie is determined by the provider of the cookie.

The legal basis for using technically necessary cookies is our legitimate interest in the technically fault-free operation and smooth functionality of our website as described in Art. 6 paragraph 1 lit. f of the GDPR. The use of statistics and marketing cookies is subject to your consent, in accordance with Art. 6 paragraph 1 lit. a of the GDPR. For more information about the cookies we actually use (specifically, their purpose and lifespan), refer to this privacy policy and to the information about the cookies we use. You can withdraw your consent for the future use of cookies at any time, in accordance with Art. 7 paragraph 3 of the GDPR. Your consent is voluntary. If consent is not given, no disadvantages arise.

You can also set your web browser so that it does not store any cookies in general on your device or so that you will be asked each time you visit the site whether you accept the use of cookies. Cookies that have already been stored can be deleted at any time. Refer to the Help section of your browser to learn how to do this.

Please note that a general deactivation of cookies may lead to functional restrictions on our website.

Cookies and Local Storage

We use cookies to make our website as user-friendly and functional as possible for you. Some of these cookies are stored on the device you use to access the site.

Cookies are small packages of data that are exchanged between your browser and our web server whenever you visit our website. They do not cause any damage and are used solely to recognise website visitors. Cookies can only store information provided by your browser, e.g. information that you have entered into your browser or that is available on the website. Cookies cannot execute code and cannot be used to access your terminal device.

The next time you access our website using the same device, the information stored in the cookies can then either be sent back to us ("first-party cookie") or to a web application of third party to whom the cookie belongs ("third-party cookie"). The information that is stored and sent back allows each web application to recognise that you have already accessed and visited the website using the browser on your device.

Cookies contain the following information:

- Cookie name
- Name of the server from which the cookie originates
- Cookie ID number
- An expiry date, after which the cookie will be automatically deleted

We classify cookies in the following categories depending on their purpose and function:

- Technically necessary cookies, to ensure the technical operation and basic functions of our website. These types of cookies are used, for example, to maintain your settings while you navigate our website; or they can ensure that important information is retained throughout the session (e.g. login, shopping cart).
- Statistics cookies, to understand how visitors interact with our website by collecting and analysing information on an anonymous basis only. In this way we gain valuable insights to optimize both the website and our products and services.
- Marketing cookies, to provide targeted promotional and marketing activities for users on our website.
- Unclassified cookies are cookies that we are trying to classify together with individual cookie providers.

Depending on the storage period, we also divide cookies into session and persistent cookies. Session cookies store information that is used during your current browser session. These cookies are automatically deleted when the browser is closed. No information remains on your device. Persistent cookies store information between two visits to the website. Based on this information, you will be recognized as a returning visitor on your next visit and the website will react accordingly. The lifespan of a persistent cookie is determined by the provider of the cookie.

The legal basis for using technically necessary cookies is our legitimate interest in the technically fault-free operation and smooth functionality of our website. The use of statistics and marketing cookies is subject to your consent. You can withdraw your consent for the future use of cookies at any time. Your consent is voluntary. If consent is not given, no disadvantages arise. For more information about the cookies we actually use (specifically, their purpose and lifespan), refer to this Privacy Policy and to the information in our cookie banner about the cookies we use.

You can also set your web browser so that it does not store any cookies in general on your device or so that you will be asked each time you visit the site whether you accept the use of cookies. Cookies that have already been stored can be deleted at any time. Refer to the Help section of your browser to learn how to do this.

Please note that a general deactivation of cookies may lead to functional restrictions on our website.

On our website, we also use so-called local storage functions (also called "local data"). This means that data is stored locally in the cache of your browser, which continues to exist and can be read even after you close the browser - as long as you do not delete the cache or data is stored within the session storage.

Third parties cannot access the data stored in the local storage. If special plug-ins or tools use the local storage functions, you are informed within the description of the respective plug-in or tool.

If you do not wish plug-ins or tools to use local storage functions, you can control this in the settings of your respective browser. We would like to point out that this may result in functional restrictions.
